VERY IMPORTANT - TO USE ONLY FREE TIER SUBSCRIPTION FOR ALL CLOUD SERVICES

It has come to our notice that few students **are not Terminating their Provisioned Cloud Instances and/or Technologies after completing their courses.**

The mentor has instructed every candidate to terminate their instance on all platforms they are working once they complete the course.

Since the respective **cloud accounts are solely owned and operated by the student**, **it is the duty of the student to check their account activity and any charges incurred due to their activity.**

In the course we have used only free tier eligible machines and free tier eligible services and the same has been notified to the students.

Cloud services and all the technologies therein are the proprietary properties of the cloud vendor. The rates, fees and charges tend to be set by the cloud providers as such. **Therefore the student must and should review the prices and the free tier eligible machines before they provision it.**

If the student provisions any additional technology or any other paid features that is not a part of the lecture and or fails to terminate any machine, Instance or any other technology and if they incur charges, Neither 1stop nor the mentor can be held liable.
